gleamgraphics@gmail.com

Hello,

My name is Jeremy Mecham and I am a professional web developer and designer. As my resume will show, I have over 12 years of front-end development experience with different industries. *As I have been employed with several temporary contracts,* it is my goal to gain employment in a permanent position or contract that may extend or go permanent.

My technical accomplishments are in the areas of JavaScript, Frameworks (MVC), PHP, MySQL, Google Tag Manager and graphic design. However, I have been focused on Next JS in recent years using a headless CMS called Sanity IO hosted on Netlify.

Furthermore, I have over five years' experience working in LMS's utilizing JavaScript, jQuery, GSAP, Scorm, Articulate Storyline and Sharepoint. I utilize Markdown for quick reference documentation and light development processes.

I am open to further discussion regarding my experience as it pertains to opportunities with your establishment.

Thank you,

Jeremy Mecham
